RAM70ND

Versatile rammer for all locations

The RAM70ND weighs just 78kg and has a compaction force of 1,600kg, making it a medium-weight and versatile rammer with great compaction performance. The RAM70ND is the perfect tool for heavy compaction in places with space constraints.

Features and Benefits

- Versatile size rammer for mid to large scale repair job
- 2 engines options: Honda or Robin 4-stroke gasoline engine
- 'Open-Engine' design allow quick access for maintenance
- Large capacity fuel tank
- Central lifting point for transportation
- High quality bellows from Germany
- Two-stage air filtration system
- Improve vibration-reduction handle and quick access throttle control
- Reinforced centrifugal clutch for better durability
- Transportation wheels options available

| Specifications for RAM70ND | |
|-----------------------------|---|
| Dimension - LxWxH (mm) | 750x420x1,070 |
| Operating Weight (kg) | 78 |
| Shoe Size - LxW (mm) | 335x285 |
| Stroke (mm) | 80 |
| Impact Force (mm) | 1,600 |
| Blows per Minute | 650-700 |
| Compaction Depth (mm) | 610 |
| Max Working Speed | 9-12 m/min 300 m ² /h |
| Fuel Tank Capacity - Litres | 3 |
| Engine Options | Robin EH12-2D @ 2.9kW 4-Stroke Gasoline |
